### **Bachelor of Social Science** | 2009 - 2011

Graduated at the University of Cape Town

## Languages

- I've put a focus on learning the fundamentals of web technologies on my journey as a developer. So I can confidently write vanilla Javascript, CSS, and HTML. Saying that, I do enjoy writing Sassy CSS (though I never enjoyed Bootstrap nor jQuery). React has not been a focal point for me, i.e. I've not built anything of note with it, though I am familiar with the fundamentals of it. Of course I'm well-versed in Liquid, being a Shopify-specific markup.
- English is my mother tongue and I speak conversational Greek, as well as basic Italian & Spanish.

I am an EU passport holder and have grown up in South Africa.
